# STREAMLINE AUTOMATION ACROSS YOUR ENTERPRISE

**automai**
Robotic Automation Platform

## Emulate real end-user activity with custom workflows of your business-critical applications

### CODE FREE SCRIPTS CAN BE USED FOR ALL AUTOMATION FUNCTIONS:

### Performance Testing

Up to thousands of bots simultaneously navigate processes through your app from their own desktops and report back performance they see as the system is loaded.

### Functional Testing

Bots execute your scenarios under different test cases.
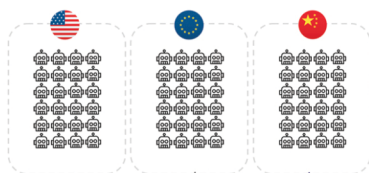

### Application Monitoring

Bots at key locations continuously run through the business processes. Proactively report slowness and failures.

### Robotic Process Automation

Bots act as a virtual workforce. Automate execution of high volume repetitive tasks error free, and in record time. Free up people in your business to get more done.
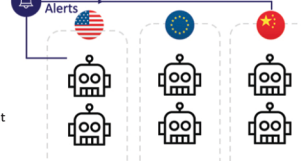

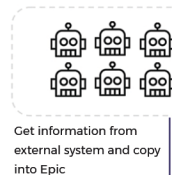

## Automai Robotic Automation Platform

**Performance** TESTING

**Functional** TESTING

Test Cases that cover all business needs, e.g:
1. Add elderly patient
2. Add out of state patient
3. With Insurance
4. Without Insurance

**Monitoring** APPLICATION

Alerts

**RPA**

Get information from external system and copy into Epic

**Pre Production**
Testing: Add a patient

**Production**
Live environment: Add/Query Patients

# What makes Automai Different?

**automai**
Robotic Automation Platform

### Custom Work Flows
Step out of canned workflows. Test the exact business processes your users are using.

### Hybrid Robotic Testing
Test from both inside and outside your remote session, getting the best of both worlds for graphical and explorer object interaction

### Flexible Test Plans
Test multiple scenarios in the same test
Login / logoff storms
Launch specific apps at the same time

### Advanced User Stories
Combine multiple applications and workflows. Nested Scenarios & Global Variables - fo r randomizing scenarios and easier maintenance

### Sizing, testing, or continuous monitoring Workloads on Azure, AWS, or GCP

### Complete View of Citrix
Pull back-end metrics/context of Citrix into load tests, and monitoring platform to give personalized relevant metrics and test details in each plan, report, alert, etc

### Complex Authentication Scenarios
Built in MFA support

### Remote Bots
Run Testing from remote locations

**Automai Corporation offers the only platform to streamline automation from DevOps to Business. Intelligent bots automate even the most complicated business processes. Code-Free scripts are leveraged for testing, monitoring and RPA. Headquartered in Los Angeles, Automai has been automating since 2000.**
